

# Get your investment back.

Realize the most value from your EHR investment.

EHRs are the obvious solution to streamlining clinical processes, but what happens when an EHR is implemented but nothing changes? Health systems are trying to find new solutions for re-registration, documentation, discharge and beyond. However, just implementing an EHR does not promise effective workflows and increased value to patients.

## Pivot Point can help.

We help you establish processes by collaborating with you to refine system workflows and achieve the highest levels of EHR performance that will deliver the most value to your organization.

## Improve patient experience and workflows.

We deliver hands-on consulting and methodologies to drive system adoption, improve clinical workflows and boost return on investment for your EHR software resulting in effective processes and a better clinician and patient experience.

### REVENUE CYCLE OPTIMIZATION.

Decrease AR days and increase cash flow through:

- ▶ Revenue cycle assessment and workflow corrections
- ▶ Patient access data capture enhancement
- ▶ Clinical documentation analysis
- ▶ Claims, denials and collections management
- ▶ Financial transparency through improved information flow

### CLINICAL OPTIMIZATION.

Focus your systems and prepare for the expansion of value-based care through:

- ▶ Clinical application strategy
- ▶ Clinical documentation workflow enhancement
- ▶ Analytics and clinical data integrity assurance / definitions
- ▶ Systems planning, requirements, selection and contracting
