

Maximize the value of your Strategic Projects.

We make healthcare IT initiatives successful.

Healthcare projects are getting larger, more expensive, more complex and impacting greater numbers of staff, physicians, and patients. Highly trained and skilled program and project management talent can accelerate progress – supplementing in house resources to drive important projects to an on time and on budget completion.

Pivot Point can help.

Our team brings deep and broad program and project management experience. We've built leading tools, methodologies and knowledge based on PMI's PMBOK standards to increase the efficiencies and value of projects.

Healthcare project, program and portfolio expertise.

From providing PMP talent to operationalizing your enterprise PMO, Pivot Point has the talent and experience to improve project results.
